Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
The interventions are distinct, each from the other based on the applicant's amendment filed 9/8/2006 and the additional reasons below:
2. A telephone call was made to Mr. Hanchuk (reg. 35179) on 11/20/2006 regarding the restriction requirement. No call has been returned. Therefore, a written election requirement is issued below.
3. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-92, drawn to methods for providing customizable validation rules from a hereditary rules library, classified in class 715, subclass 507.
 - II. Claims 93-104, drawn to methods for determining browser capability, classified in class 715, subclass 760.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because providing customizable validation rules from a hereditary rules library of Group I does not discuss the determination of

browser capability of Group II. The subcombination has separate utility such as a method of determining if a browser support regular expressions.

Therefore, these inventions are distinct for the reasons given above.

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
